

Updates in Lung, Gynecologic, and Perinatal Pathology, and COVID Variants.

Photo: Travel Portland

■ Learning Objectives:

- Recognize the new WHO Classification of Endocervical Adenocarcinomas.
- Recognize the different appearance of non-HPV related adenocarcinomas.
- Understand the new emerging techniques for tissue acquisition in the setting of lung cancer.
- Combine tumor morphology with focused immunohistochemical staining for the accurate diagnosis of lung cancer on cytology and small biopsy specimens.
- Identify the ever growing number of biomarker targets that need to be assessed for non-small lung cancer.
- Develop diagnostic and laboratory strategies to help ensure optimal downstream testing success.
- Apply newly proposed diagnostic criteria and terminology when signing out lung cancer specimens.
- Recognize the changes in lung cancer terminology and description of new entities compared to the previous 4th edition WHO lung blue book.
- and more...

■ ACCREDITATION

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the College of American Pathologists and PNWSP. The College of American Pathologists is accredited by the ACCME to provide continuing medical education for physicians.

■ CME DESIGNATION

The College of American Pathologists designates this live (or internet live) educational activity for a maximum of 9 AMA PRA Category 1 Credit(s)[™]. Physicians should claim only credit commensurate with the extent of their participation in the activity.

■ DISCLAIMER

The content of this accredited CE (CME) activity does not necessarily reflect the view or policies of the College of American Pathologists.
