

Gastrointestinal Pathology

Photo: Tourism Vancouver

■ Learning Objectives:

- Recognize and describe criteria for separating dysplastic and non-dysplastic Barrett mucosa.
- Recognize and diagnose the importance of the location in GI tract samples as an aid to diagnosis.
- Diagnose and Identify clinically significant metastases.
- Recognize the range of patterns of injury associated with modern immunotherapy.
- Identify and define features that place patients at risk for pseudomyxoma peritonei.
- Recognize a systematic approach to inflammatory disorders of the stomach.
- Identify and recognize mimics of malignant colorectal polyps.
- Recognize and resolve differential diagnoses using both histology and clinical data, thus maximizing the impact of biopsy/resections.
- Identify and recognize the appropriate immunohistochemistry panel in pancreatic FNB specimens.
- Recognize and Identify the latest classification of intestinal T cell lymphomas and differentiate them from their mimics.

■ ACCREDITATION

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the College of American Pathologists (CAP) and Pacific Northwest Society of Pathologists. The College of American Pathologists is accredited by the ACCME to provide continuing medical education for physicians.

■ CME DESIGNATION

The CAP designates this live educational activity for a maximum of *10 AMA PRA Category 1 Credits*TM. Physicians should claim only credit commensurate with the extent of their participation in the activity.

■ DISCLAIMER

The content of this CME activity does not necessarily reflect the view or policies of the College of American Pathologists.
